# 1000M Controller
Compatible with *FUKUHARA 20M/30M/100M*

1000M controller was developed for users who have Fukuhara knitting machines controlled by 20M, 30M and 100M.

20M/30M/100M controllers are no longer supported by Fukuhara. If those controllers can't be fixed, user has to give up to continue running machines.

Now we developed completely compatible controller with Fukuhara/Monarch.

Memory capacity is more than Fukuhara 100M controller and also the price is extremely less expensive than previous Fukuhara controllers.

Dimensions

Supported machine:
All Fukuhara electronics machines that are controlled by 20M/30M/100M
Media: Fukuhara 100M Floppy disk
Memory capacity: 256MB
Operating panel: LCD screen with touch panel
Power source: AC100V± 10%
Environments:
Operating temperature : 0 to 50° C
Humidity : 20% to 80% (no condensation

## Operating Panel

LCD screen with touch panel
